

CONNECTED BACKUP 8.4 ARTICLE MATRIX

The following table identifies Digital Resource Center articles and their new location within the Connected® Backup 8.4 documentation set.

Number	Article	Manual
1959	Adding a Mirror to a Standalone Data Center	<i>Connected Backup Data Center Deployment</i>
1419	Agent Command Line Interfaces	<i>Connected Backup for PC Agent Deployment Connected Backup for Mac Agent Deployment</i>
1176	Agent Command Line Switches	<i>Connected Backup for PC Agent Deployment Connected Backup for Mac Agent Deployment</i>
709	Agent Software Requirements	<i>Connected Backup Requirements Matrix</i>
1435	Converting a Mirrored Data Center to a Clustered Data Center	<i>Connected Backup Data Center Deployment</i>
1185	Converting a Mirrored Data Center to a Standalone Data Center	<i>Connected Backup Data Center Deployment</i>
264	Data Center Sizing Guidelines	<i>Connected Backup Requirements Matrix Connected Backup Data Center Deployment</i>
1963	Data Center Sizing Guidelines for Mac and PC Accounts	<i>Connected Backup Requirements Matrix</i>
1126	Data Center Sizing Guidelines for PC Accounts	<i>Connected Backup Requirements Matrix</i>
250	Data Center Software Requirements	<i>Connected Backup Requirements Matrix</i>
1437	Geographic Assignment of data Center Servers and Communities	<i>Connected Backup Data Center Deployment</i>
1422	Installation Command-Line Options and Parameters	<i>Connected Backup for PC Agent Deployment Connected Backup for Mac Agent Deployment</i>
759	Making the Secondary Server the Primary Server	<i>Connected Backup Data Center Deployment</i>
789	Monitoring and Restarting SQL Replication (now Re-establishing SQL Replication)	<i>Connected Backup Data Center Deployment; Connected Backup Disaster Recovery</i>
1438	Moving the Data Center to a Different Domain	<i>Connected Backup Data Center Deployment</i>
1638	Recovering a Clustered Data Center Server After a Disaster	<i>Connected Backup Disaster Recovery</i>
1639	Recovering a Mirrored Data Center Server After a Disaster	<i>Connected Backup Disaster Recovery</i>
1637	Recovering a Mirrored Pair from a Cluster Data Center After a Disaster	<i>Connected Backup Disaster Recovery</i>

Number	Article	Manual
1641	Recovering a Standalone Data Center After a Disaster	<i>Connected Backup Disaster Recovery</i>
1629	Recovering Archive Sets After a Disaster	<i>Connected Backup Disaster Recovery</i>
1651	Recovering Archive Sets After Loss of a Volume on a Mirrored or Clustered Data Center	<i>Connected Backup Disaster Recovery</i>
1652	Recovering Archive Sets After Loss of a Volume with No Backup	<i>Connected Backup Disaster Recovery</i>
807	Recovering Databases to a Data Center Server from SQL Server Backup Files	<i>Connected Backup Disaster Recovery</i>
1634	Recovering Databases to a Mirrored Data Center Server After Full Loss of the Server	<i>Connected Backup Disaster Recovery</i>
1376	Recovering Databases to a Mirrored Data Center Server After Loss of Database Files Only	<i>Connected Backup Disaster Recovery</i>
1632	Recovering Databases to a Mirrored Data Center Server with Stopping Services	<i>Connected Backup Disaster Recovery</i>
1633	Recovering Databases to a Mirrored Data Center Server without Stopping Services	<i>Connected Backup Disaster Recovery</i>
1436	Recovering Databases to a Newly-Added Mirrored Data Center Server	<i>Connected Backup Disaster Recovery</i>
1615	Recovering PC Agent Configurations After a Disaster	<i>Connected Backup Disaster Recovery</i>
1582	Recovery of a Clustered Data Center with Registry Database Backup	<i>Connected Backup Disaster Recovery</i>
1608	Recovery of Agent Configurations	<i>Connected Backup Disaster Recovery</i>
1590	Recovery of an Entire Mirrored Data Center	<i>Connected Backup Disaster Recovery</i>
1553	Recovery of Archive Sets	<i>Connected Backup Disaster Recovery</i>
1552	Recovery of Archive Sets on a Clustered Data Center	<i>Connected Backup Disaster Recovery</i>
1555	Recovery of Archive Sets on a Mirrored Data Center	<i>Connected Backup Disaster Recovery</i>
1556	Recovery of Archive Sets on a Standalone Data Center	<i>Connected Backup Disaster Recovery</i>
1577	Recovery of Both Microsoft SQL Server and the SQL Databases	<i>Connected Backup Disaster Recovery</i>
1596	Recovery of Both Registry Master Servers	<i>Connected Backup Disaster Recovery</i>
1585	Recovery of Both Servers of a Cluster Pair	<i>Connected Backup Disaster Recovery</i>
1591	Recovery of Both Servers of a Mirrored Data Center	<i>Connected Backup Disaster Recovery</i>
788	Replacing a Failed Mirrored or Clustered Data Center Server with New Hardware	<i>Connected Backup Data Center Deployment</i>

Number	Article	Manual
1804	Replacing a Standalone Data Center Server with New Hardware	<i>Connected Backup Data Center Deployment</i>
418	Swapping Primary and Secondary Data Center server assignment	<i>Connected Backup Data Center Deployment</i>

Note: If you do not see the article you are looking for in this matrix, please check the Connected Backup 8.3 version of the Digital Resource Center.
